PCC My Kids Chart

Is there a Portal App for my smart phone?

There is not an App for your smart phone; however, Apple and Android have solutions available to save the URL on your home page and it appears like an App.

Follow these instructions:

When on your smart phone, go to <https://brookville.pcc.com/portal>

iPhone users:

- 📄 When you are on the portal website, look at the bottom of the screen and find the “share” symbol and click it.
- ➕ Then, scroll down and find “add to home screen” and click it. Now you have an “app” on your home screen that links directly to the portal website.

Android users:

- 1) Upper right three dot context menu brings the drop-down.
- 2) Choose Add to home screen.
- 3) That gives a window where the shortcut can be renamed, click Add.
- 4) The next window gives an option to “Add automatically” or push and hold then the location of the shortcut can be chosen manually on the home screen by dragging the shortcut to the desired spot.
